

Writing project #3

Name = Melanie Rodríguez Jiménez

UTN

English #5

Our company wants to improve for the environment, I wish more people would embrace recycling to create a greener and healthier planet for future generations. That's why now we only print what is necessary and double-sided

I am looking to help the environment through Technology.

I want to incorporate the latest technology in my company to improve efficiency. For example, have a work email, where I will inform everything about the company.

There will no longer be paper news, this will help economically and the environment.

I wish for everyone in my company to become environmentally conscious, actively learning about recycling, and no longer desiring to contribute harm to the planet.
